Since every guitar is handmade almost anything is possible so please inquire for other options.

When you order a guitar I ask for a €1000 deposit, this secures your place in the que and also locks in todays base price. The deposit is to cover initial expenses such as materials for your guitar and is non-refundable.

About 1 month before the build we will start to finalize your wood choices, options, and specifications. Prior to starting the guitar I ask for a 25% pre-payment, this is to cover my financial costs during the build process. The remaining balance is due upon the guitars completion prior to shipping.

Please note shipping, local taxes and VAT is not included in the base price
